### **DETAILED ACTION**

1. The amendment filed June 17, 2003, has been received and entered. The text of those sections of Title 35, U.S. Code, not included in this action can be found in a prior Office action.
2. Claims 1-21 are pending.
3. This application contains claims 7-18 and 21 drawn to an invention nonelected with traverse in Paper No. 7. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
4. Claims 1-6, 19, and 20 are examined on the merits.

### ***Claim Objections***

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 4-6, 19, and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by US Pat. No. 6,294,526 in light of US Pat. No. 5,070,018 as evidence of qualities inherent in US '526.

Art Unit: 1654

US '526 teaches isolating luteolin from *Scutellaria barbata*. Luteolin is isolated by extracting the plant in a solvent, filtering the solvent, and extracting the filtrate to obtain luteolin (see paragraph spanning columns 3 and 4). While US '526 does not mention what the optical absorbance of luteolin is; US '018 shows that the absorbance of luteolin is 349 nm in methanol (see Table I). Therefore, US '526 teaches isolating a fraction from *S. barbata* that has an optical absorbance between 200 and 500 nm.

6. No claims are allowed. However, claims 2 and 3 would be allowable if amended to overcome the claim objection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
